

**Third Quarter Commentary**

The MSCI World ex USA IMI Net Index returned 5.86% in the third quarter. Global stocks benefitted from improved growth prospects and increased corporate earnings. In the third quarter, more economically sensitive sectors such as Financials, Industrials, and Consumer Discretionary outperformed more defensive sectors such as Telecommunications, Health Care, and Utilities.

SGA's International All Cap Equity strategy outperformed the benchmark in the third quarter, primarily driven by stock selection within sector. Outperformance was driven by strong selection in several sectors including Consumer Discretionary where Italian auto maker Ferrari exceeded analyst earnings expectations for the seventh consecutive quarter. Consumer Staples selection was strong as well including Norwegian fish farming company Bakkafrost. In Industrials, Spain-based Siemens Gamesa Renewable Energy retreated post-merger due to combination of weak quarterly results and downgrades to 2018 estimates. However, its EPS growth is expected to reaccelerate as the company seeks to extract cost synergies in the coming year.

Stock selection was positive in Germany and Japan, partially offset by weak selection in Spain and Hong Kong. In Germany, electric power producer Uniper was a strong contributor and in Japan semiconductor equipment and LCD screen manufacturer ULVAC rallied on strong earnings results.

**Country and Regional Diversification\*      Performance as of 09/30/2017**

\*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA International Equity portfolio as of the date noted. These holdings, sectors, country, and regional weights are subject to change at any time without notice. Individual account data may vary. This information is supplemental to the annual disclosure presentation.

The MSCI World ex-U.S. IMI Net Index is free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets, excluding the U.S. The MSCI World ex-U.S. IMI Net Index returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A – Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

\*Performance represents a non-annualized partial period return beginning on April 30, 2008.

\*\*The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

International All Cap Equity Composite includes all discretionary, fee paying, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international all cap securities. The minimum account size for this composite is \$100 thousand. Beginning January 1, 2017, accounts in this composite may contain client imposed investment restrictions. For comparison purposes, the composite is compared to the MSCI World Ex-U.S. IMI Net Index. The International All Cap Equity Composite was created April 30, 2008. Prior to December 31, 2016, the International All Cap Equity Composite was known as the International All Cap Core MSCI World ex-U.S. IMI Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through June 30, 2017. The verification report(s) is/are available upon request.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

SGA is an independently registered investment advisor. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI World ex-U.S. IMI Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fees performance was calculated using the highest applicable annual management fee of 1.00% applied monthly.

The annual composite dispersion presented is an asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

From September 30, 2013 to March 31, 2014, composite policy included two scenarios that require the temporary removal of any portfolio due to a client initiated significant cash inflow or outflow: 1) When the cash inflow or outflow represents from over 5% to 10% of portfolio assets and it takes longer than five trading days to reduce cash levels to less than 5%, and 2) When the cash inflow or outflow represents more than 10% of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite at the beginning of the month after the cash level in the portfolio is reduced to less than 5%. Additional information regarding the treatment of significant cash flows is available upon request.

Past performance is not indicative of future results.

Maximum fee is 1.00%; actual investment advisory fees incurred by clients may vary.
