

### Third Quarter Commentary

International small cap equities continued to advance in the third quarter after a strong first half of the year as the MSCI World ex USA Small Cap Net Index returned 7.26% in the third quarter. Building on outperformance in the first half of the year, the SGA International Small Cap Equity strategy outperformed the benchmark in the third quarter.

Returns due to sector allocation were essentially neutral while stock selection within sector was the primary driver of outperformance. Selection was positive in eight of eleven sectors and was strongest in Consumer Discretionary, Energy, and Utilities, while Health Care and Industrials were areas of weak stock selection. In Consumer Discretionary, the larger contributors were Spanish auto components manufacturer CIE Automotive and Canadian cable TV and Internet service provider Cogeco Communications.

Stock selection was strong in Japan, Italy, and Australia, partially offset by weak selection in Belgium and Austria, where the single Austrian holding in the portfolio, Lenzing, a textiles and plastics manufacturer, was down for the quarter. Strong selection in Japan was led by semiconductor equipment and LCD screen manufacturer ULVAC and Kyowa Exeo, which builds telecommunications infrastructure. In Italy, strong contributors included IT systems consulting firm Reply and toll road operator ASTM.

\*Holdings, sector, country, and regional diversification represents the holdings, sectors, and country weights in the SGA International Equity portfolio as of the date noted. These holdings, sectors, country, and regional weights are subject to change at any time without notice. Individual account data may vary. This information is supplemental to the annual disclosure presentation.

The MSCI World ex-U.S. Small Cap Net Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of small cap securities in the developed markets excluding the U.S. The MSCI World ex-U.S. Small Cap Index returns include reinvestment of dividends and other earnings, and are not available for direct investment.

Investors should consider all factors, including investment objectives, fee charges, other expenses and risks carefully before investing in this product. A foreign investment offers diversifying characteristics, but also involves greater risks than investing in securities of U.S. issuers, including currency, political and stock specific risks. SGA products may have a negative return in a variety of markets whether rising or falling. The foreign security performance can be volatile and investors could lose a substantial amount of their investments. This material should not be reproduced or distributed to anyone else, but used solely by the recipient and their investment advisors. This material provides information on Strategic Global Advisors and their investment strategies and is not intended to be construed as an offer to sell or buy their products.

There is potential for shortfall in any investment process due to a variety of factors including, but not limited to, data and system imperfections, analyst judgment, and the complex nature of designing and implementing portfolio construction systems and other quantitative models. Such shortfalls in systematic or quantitative processes in particular pose broader risk because they may be more pervasive in nature. Furthermore, SGA's systems may not necessarily perform in a manner in which they have historically performed or were intended to perform. SGA recognizes that such shortfalls are inherent to both fundamental and systematic or quantitative processes, and believes that combining both approaches improves the opportunity to reduce these shortfalls. However, these efforts may not necessarily result in the identification of profitable investments or the management of risk.

N/A – Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

\*Performance represents a non-annualized partial period return beginning March 31, 2010.

\*\*Beginning January 1, 2017, pure gross returns are shown as supplemental information for bundled fee accounts and are stated gross of all fees and transaction costs.

\*\*\*The 3-year annualized ex-post standard deviation is not shown when there are not 36 monthly performance returns available.

**International Small Cap Equity Composite** includes all discretionary, equity only accounts whose primary investment objective is growth, and secondarily yield, and are invested in international small cap securities. The minimum account size for this composite is \$100 thousand. From inception through November 30, 2013, the composite was compared to the MSCI EAFE Small Cap Net Index. On December 1, 2013, the comparative benchmark for the composite was changed to the MSCI World Ex-US Small Cap Net Index. This index includes Canadian securities, while the EAFE Small Cap Index does not. The list of eligible countries for the strategy has included Canada since its inception, and the strategy has typically included investments in Canadian securities. Therefore, the MSCI World Ex-US Small Cap Net Index is more closely representative of the strategy, and in fact, the strategy has maintained a lower tracking error versus this index since inception. This change of benchmark was made retroactively to the inception of the composite. The International Small Cap Equity Composite was created March 31, 2010. Prior to December 31, 2016, International Small Cap Equity Composite was known as the International Small Cap Core Equity Composite.

Strategic Global Advisors, LLC (SGA) claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. SGA has been independently verified for the periods December 1, 2005 through June 30, 2017.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firmwide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The International Small Cap Equity Composite has been examined for the periods January 1, 2014 through June 30, 2017. The verification and performance examination reports are available upon request.

SGA is an independently registered investment advisor. The firm maintains a complete list and description of composites, which is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Withholding taxes may vary according to the investor's domicile. Composite returns represent investors domiciled primarily in the United States. The MSCI World Ex-US Small Cap Net Index uses withholding tax rates applicable to Luxembourg holding companies.

The U.S. dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fees performance was calculated using the highest applicable annual management fee of 1.50% applied monthly. Some accounts in this composite pay a bundled fee (or wrap fee) based on a percentage of assets under management, which in addition to brokerage commissions, the fee includes portfolio monitoring, consulting services, and in some cases, custodial services. From March 31, 2010 through December 31, 2016, gross and net returns have been reduced by the fees for these services. Beginning January 1, 2017, pure gross returns are shown as supplemental information for bundled fee accounts and are stated gross of all fees and transaction costs.

The annual composite dispersion presented is an asset weighted standard deviation calculated for the accounts in the composite the entire year and is only presented for periods with more than five accounts in for the entire year. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.

Past performance is not indicative of future results.

Maximum fee is 1.50%; actual investment advisory fees incurred by clients may vary.
